## Ten New Zealand short films and teaching resources

Ten is available as a DVD and packaged teaching resource. The DVD features a number of successful New Zealand short films that cover a wide range of themes and ideas. The resources are photocopiable and include shots from each short film to guide teachers and students.

As students study each short film they build skills in three key curriculum areas: What's the story? (film narrative and structure) | Close reading (exploring language) | Think about it (thinking critically about ideas and issues)

TEN includes the following New Zealand short films:
